GMP equalisation Data health check

Our quick data health check makes kick-starting GMP equalisation easy by answering 3 key questions:

- + Which members are in scope for the exercise?
- + Which members' benefits will be significantly impacted?
- + What data have I got, and how much more do I need?

IN JUST 4 WEEKS YOU'LL GAIN THE FOUNDATIONS TO SUPPORT THE REST OF YOUR PROJECT

IDENTIFY MEMBERS IN SCOPE

- ✓ Find out which members are impacted by GMP equalisation, including transfers out
- ✓ Identify which members may still require corrections following reconciliation
- ✓ Carry out mortality screening on your current data

CALCULATE THE FINANCIAL IMPACT

- ✓ Identify members most impacted by GMP equalisation
- ✓ Identify overlap with members who still require corrections following reconciliation
- ✓ Prioritise groups for action, and inform your decisions on methods and approach

DIAGNOSE MISSING DATA

- ✓ Identify the data you need to calculate benefit adjustments for your members
- ✓ Analyse current availability of data
- ✓ Prioritise cleanse for members who are most impacted by GMP equalisation

YOUR FIRST STEP TO GMP EQUALISATION

Taking complicated data and interpreting it to save you time and money is what we do.

A GMP EQUALISATION DATA HEALTH CHECK WILL:

- ✓ Assess your data readiness
- ✓ Inform decisions on methods and approach
- ✓ Enable you to prepare your data efficiently
- ✓ Access further support through our data platform
